ADITYA SINGH

AI Engineer • ML Engineer • Generative AI Specialist • Data Scientist

adssingh9090@gmail.com | +91-9310821065 | linkedin.com/in/adityasingh-7210b2267 | github.com/ADITYASINGH77770000 | Delhi, India

EDUCATION

Master of Computer Applications (MCA) – Generative AI *Aug 2025 – June 2027 (Expected)*
SRM Institute of Science and Technology, Chennai

Bachelor of Computer Applications (BCA) – Data Science *Aug 2022 – May 2025*
SRM Institute of Science and Technology, Chennai

TECHNICAL SKILLS

Programming & Tools: Python, SQL, Git, Jupyter Notebook
AI/ML Frameworks: TensorFlow, PyTorch, Scikit-learn, Transformers, LangChain, spaCy, HuggingFace
Data Science: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Statistical Analysis, Predictive Modeling, EDA
Specializations: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, LSTM Networks, Computer Vision
Databases & Visualization: SQLite, MySQL, Power BI, Streamlit, Interactive Dashboards

EXPERIENCE

Google Student Ambassador – Google *Sept 2025 – Dec 2025*

- Served as primary liaison between Google and the student community, organizing technical workshops and campaigns to promote Google's AI/ML ecosystem
- Built brand advocacy strategies reaching 500+ students, showcasing Google's innovation in AI, accessibility, and inclusivity
- Strengthened leadership, public speaking, and event management skills while growing a cross-functional professional network

Data Science Intern – CodeClause *Sept 2024 – Oct 2024*

- Engineered end-to-end ML pipeline for Customer Lifetime Value prediction using Random Forest and Gradient Boosting, enabling customer segmentation and retention strategies
- Developed house price prediction model with 92% accuracy using ensemble methods, feature engineering, and hyperparameter optimization; created a deployable evaluation pipeline
- Performed comprehensive EDA and statistical analysis on large datasets to uncover behavioral patterns and inform data-driven decisions

Machine Learning Intern – Encryptix *July 2024 – Aug 2024*

- Built classification models for Titanic survival prediction and credit card fraud detection achieving 95%+ accuracy using Logistic Regression, Random Forest, and Decision Trees
- Developed regression model for sales forecasting leveraging historical trends and seasonality; applied full supervised ML lifecycle (EDA → modeling → evaluation)
- Applied feature engineering, preprocessing, and model evaluation across multiple supervised learning projects to drive business-ready insights

KEY PROJECTS

Finnovix – AI-Powered Financial Intelligence Platform

- Built LSTM-based stock price forecasting engine integrated with anomaly detection and automated report generation using Python, Streamlit, and yFinance
- Designed interactive Plotly dashboards and SQLite database for real-time market insights with a virtual assistant interface for non-technical users

RainGuard AI – Flood Early Warning System

- Built end-to-end AI-driven flood risk assessment platform combining ML, Deep Learning (ANN), and Reinforcement Learning to predict flood risk from environmental, geographical, and population data
- Applied Computer Vision (OpenCV) for flood severity detection from images, and Geospatial Analysis on GIS datasets (GeoJSON, GPKG) to map low-lying, high-risk regions
- Integrated Generative AI with RAG architecture for context-aware disaster response queries; built a Reinforcement Learning alert mechanism to dynamically trigger warnings based on risk severity
- Developed interactive Python dashboard unifying flood predictions, GIS risk visualization, AI chatbot support, and alert insights into a single platform
- Tech Stack: Python, TensorFlow/Keras, OpenCV, Scikit-learn, Reinforcement Learning, GIS, RAG, Pandas, NumPy

Brainwave – Advanced Multi-Domain AI Chatbot

- Architected an intelligent conversational AI system using Transformers, spaCy, and Gemini API for context-aware multi-domain interactions
- Implemented production-grade NLP pipelines and LLM integration for sophisticated dialogue management and question answering

ACHIEVEMENTS & CERTIFICATIONS

- ★ 5× Hackathon Winner – First place across AI, Data Science, and Application Development competitions
- ★ Best Use of Generative AI Award – Recognized for cutting-edge AI innovation in hackathon competition
- ★ 10+ Hackathon Participant – Consistent track record of innovation and problem-solving in competitive technical challenges
- ★ Udemy Certified – LLM Engineering Professional Certificate
